

WE PROVIDES FAST, EFFECTIVE SOLUTIONS FOR YOUR PIPELINE REPAIR REQUIREMENTS.

Composite wrap repair

Composite wrap is a cost-effective pipeline repair technology, suitable for non-leaking and leaking defects such as pits, dents, gouges, and external corrosion. Composite wrap can be performed on an operating pipeline without taking it out of service.

BENEFITS OF COMPOSITE WRAP REPAIR

We provide bespoke solution, engineering and technical support and on-site assistance tailored to each clients specific needs.

- Engineered and installed in compliance with ISO 24817 & ASME PCC-2 standards.
- Any defaults can be repaired any pipeline,
